

## Wanted: \$2,000 In Cash

The wheels have started rolling and since publication last week of an idea to purchase another fire truck in Pahokee, public subscriptions have started to come in. Members of the Pahokee Volunteer Fire Department are pleased with the response and believe that the necessary \$2,000 for a down payment on the truck will be forthcoming from those folks who live outside the corporate limits of Pahokee and expect service from the Fire Department.

A new and fully equipped truck will cost in the neighborhood of \$8,000 and the City of Pahokee has agreed to make the balance of the payments after the \$2,000 down payment is met by public subscription. In the event, however, that the \$2,000 amount is not met by donations the money will be returned by the treasurer of the Fire Department to each individual donor.

The City of Pahokee now owns one truck and insurance companies, which cover Pahokee property, insist that this one truck be kept within the corporate limits. If outsiders are to be given fire protection it is necessary that another truck be added to the department.

Public subscription forms have been left at Miller's Drug Store and Hooks Grocery store in Canal Point and at the Palm Service Station and Pahokee Dry Goods Store in Pahokee. Drop by any one of these places and put your name on the dotted line opposite the amount you desire to contribute or for your convenience we are printing below a form that can be easily filled out and mailed to D. W. Cunningham, Secretary-Treasurer, Pahokee Volunteer Fire Department, Pahokee, Fla.

## Cold Wave Ruins 90 Pct. Of Bean Crop; Replanting Starts

### Celery & Cabbage Come Through Cold With Slight Damage

Cold weather hit the Lake Okechobee farming region Monday night and Tuesday morning. Results were to be seen after thousands of acres of tender crops were destroyed. The entire bean crop was wiped out with the exception of a few plots scattered throughout the farm section. It is estimated that 90 per cent of the beans were lost.

At least 35 per cent of the cabbage crop was lost as well as 20 to 25 per cent of the lettuce. Much damage was done to all other leafy crops.

Celery stood the cold wave well. It was pointed out by officials of the Everglades Growers Cooperative. Not much damage has been reported to this particular crop. However, it is possible that outside leaves may have been damaged some, calling for deeper stripping when the celery is graded and readied for packing.

Coldest temperature was recorded at an official weather bureau station six miles southeast of Belle Glade where the mercury dropped to 22 early Tuesday morning. Farmers in this area already have started replanting for a spring crop. Tractors are busy today discing the bean fields in order that new crops may be planted at the earliest date. Several thousand bushels of seed will go into the ground before Sunday night.

Mr. and Mrs. A. J. Metts of Canal Point announce the birth of a daughter at the Everglades Memorial Hospital on Tuesday, Feb. 16. Mr. Metts is a member of the U. S. Navy now stationed at a training field in Maryland.

## Red Cross Would Halt Accidents

As a vital part of its war program, the Palm Beach County Red Cross Chapter is making arrangements for an accident prevention class at the chapter house, beginning Tuesday, Feb. 16.

Dr. W. J. Fenton, staff physician

for the Eastern Area First Aid, Water Safety and Accident Prevention Service, is coming to conduct the course.

Anyone may join the accident prevention class and Arthur Hill, chairman of the Chapter's Accident Prevention Committee, is making every effort to obtain a large enrollment.

"Appalling accident statistics point to the need of enlisting every-

man, woman and child in the campaign to reduce accidents in the home," Chairman Hill said. "Accidents in industry have been reduced 50 per cent in the last 25 years, but in 1941, 32,000 workers died in accidents while off the job. Most of those fatalities occurred in the home, where injuries amounted to more than 4,000,000 and costs reached \$500,000,000. A class for colored first aid in-

## Will Abolish Jobs of Justices & Constables

TAMPA, Feb. 18. (FNS)—The office of Justice of the Peace and Constables in counties having more than 50,000 population would be eliminated under a proposed state constitutional amendment sent to the Legislature last week by the Florida Taxpayers Association.

At the same meeting the Taxpayers Association endorsed the creation of a State Tax Commission, an institutional plan of paying taxes, consolidation of city and county assessment offices, a similar range of tax collection offices and repeal of local acts allowing employment of special delinquent tax collection attorneys on a fee basis.

## Labor Shortage Slows Sugar Deal

CLEVELAND, Feb. 18. (FNS)—Labor has become the acute problem in connection with the harvesting of Florida's 100,000-acre sugar crop according to Jay W. Moran, general manager of the United States Sugar Corporation.

"While the company is utilizing every possible mechanical help in this work, 1,500 additional hands are needed if quotas are to be met. Absenteeism on the part of many men employed in further aggravating the situation."

Secretary Wickard has given warning that 3,500,000 persons will be needed on the nation's farms next summer if agriculture is not to face a breakdown.

"What is not realized," Moran said, "is that Florida agriculture is facing an acute crisis NOW, and action next summer will be too late to help the situation here."

Structors has been announced by Mr. Charles Weiler, First Aid Chairman, beginning Monday night, February 15, to be conducted by Dr. W. J. Fenton.

Each of the classes will continue five nights.

## THE OLD JUDGE SAYS...

"You can't imagine, Judge, how much comfort Louise and I got out of reading that report by the Office of War Information on drinking habits in and around Army camps. If you hadn't fooled us you-cop we'd still be worrying about our Jim... all because of those silly rumors going around."

"I'm mighty glad to hear that, John. As the report says, no Army in American history has been so orderly, so well-behaved,

so well-trained. Why, even on pay-night, there's very little drinking done. I was particularly interested in that part which said the Army, with an eye to its own problem, usually prefers to have its camps in wet communities rather than dry communities because wet communities can be regulated... dry communities with their bootleggers can't. It's just more proof that prohibition does not prohibit."

## How Indian River Citrus Fruit Helps Build MORE TANKS.

Jobse felt too ill to work. He was down with one of his frequent colds. After the doctor ordered more citrus fruit and fresh vegetables in his diet he was on the job regularly, week after week, turning out tanks.

And so with millions of the workers in the nation's shipyards and war plants. Every day lost due to illness means fewer guns, tanks, ships, planes and shells at a time when every minute of production counts.

Over the Florida East Coast Railway is the nation's shipyard and war plants. Every day lost due to illness means fewer guns, tanks, ships, planes and shells at a time when every minute of production counts.

And were it not for the adequate transportation service provided by the Florida East Coast Railway and other railroads these valuable Florida products could not be profitably marketed.

This is but another way in which the railroads today are proving the very "Life-Line of the Nation."
